

# SW 7001

## DCS 6000 Streaming & Archiving Server/Client Software Package

### Configuration

SW 7001

The SW 7001 Streaming & Archiving Server/Client Software Package is used together with the SW 6000 to record or to stream live over the web conference audio, video and/or conference information. It is unique to have this kind of capability integrated into a conference system and it opens new dimensions of having remote delegates participate in the conference. The name of the meeting, the agenda item and speaker is presented below the video picture. Voting results are presented as well. The archived files can be easily searched on delegate name, conference name, agenda item and/or date. The SW 7001 software package consists of the JD400 Meeting Encoder, JD450 Communication Service and JD710 Media Player.

### Highlights

- Comprehensive archiving of audio, video and conference information
- Streaming of full conferences live over the web
- Enables full compliance with OSHA requirements
- Managed and controlled from the SW6000 user interface

### Used With

CU 6005  
CU 6011

### Requires

SW 6000  
SW 6008  
SW 6085  
SW 6086

### Includes

SW7001  
JD400 Meeting Encoder  
JD450 Communication Service  
JD710 Media Player

### Specifications

Specifications		
Computer Requirements	Minimum Processor	Pentium 1.5G
	Memory	2GB Ram
	Hard Disk	To Match Archiving requirements
	Networking	Ethernet card
	Graphics	VGA screen, resolution 1024x768
	Inputs	CD-ROM drive
	Operating System	Windows 2000 SP3, XP, SPL, Vista
